

# Feature Highlight

## Server Performance

Server Performance organizes the numbers about each server and assembles a personalized report card to help your team improve. By looking at each individual, you can assess the rock-stars, view areas for coaching, and ultimately help your servers earn more.

### Server Report Card

Use the Server Performance leaderboard to track sales per cover, break it down by menu category, fix problems, and recognize your stars.

### Trends and Comparison

Which servers are flipping tables and which are standing as the burgers flip? Time each server's turns, with comparisons and trends, to find out which servers need to speed up service.

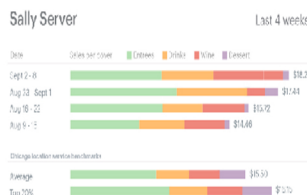

### Find Coaching Opportunities

What does a struggling server cost your business? More than you might think. A server's below-average beverage sales can cost you \$600 in lost sales last week. It shows which servers need help and exactly where they are struggling.

Server	Sales per cover (\$)	Variance	Covers	Lost sales (\$)
Eric Gagan	22.15	3.85	370	1,281.25
Randy Stanley	21.47	2.53	276	700.24
Cynthia Adams	21.14	1.88	250	465.00

Tells you everything you need to know to identify best servers and take a few minutes each week to coach your weaker servers so you can both put a few more Benjamins in the bank each month.

### Benefits of Server Performance

Identify servers to coach so you can make the biggest impact on your bottom line

Share scorecards with each server so they can track their progress from week to week

Encourage weaker servers to shadow top performers to learn tips to raise their average check size

Schedule your top performing servers on busy nights and send them to take care of your VIPs to provide the best experience

Help servers and the business succeed
